

13 Steps to a Well Beveled Coffin. And Why It Is Better

- 1) There is more surface for the nails to be put into.
- 2) Twice the surface on each seam
- 3) Water has to go up a slant.
- 4) Stress is up and down like people in a house
- 5) Laying down stress is side to side
- 6) Except When
- 7) A body is not square
- 8) Animal Magnetism
- 9) Stress in a coffin slants so a bevel is better
- 10) In old grave dirt sinks on it
- 11) The stress in the ground is up and down
- 12) Make it on a bevel
- 13) It does a nicer job
